Hydro One Show House

No 15, Jalan USJ 3/2, USJ 3,
Subang Jaya, 47600 Subang Jaya,
Selangor, Malaysia
(Viewing by appointment only)

Renowned for its masterly architectural works testified by more than 15 years of experience, Hydro One continues to make ambitious endeavors to transform the outdoor environment of homes abroad Malaysia into a place of bona fide beauty. All of Hydro One's products are all designed by an insightful and experienced landscape architect from Malaysia which has been uniquely fashioned to

The Hydro One Picola is the epitome of grandeur every home would covet for. With an exquisite design and cutting edge technology, it aims to maximize comfort to its users while minimizing energy consumption to align with its environmentally-friendly vision for urban living.

Hydro One Picola consists of an outdoor roof structure that is completely made of aluminum which fuels its sturdiness and strength, designed to form an intelligent open roof system. The 'intelligence' in its roof system is by virtue of the flexibility of the aluminum blades which offers zero limitations in their direction of folding and unfolding, allowing you to be in control of the amount of sunlight penetration or shielding yourself from harsh and unfavorable weather conditions.

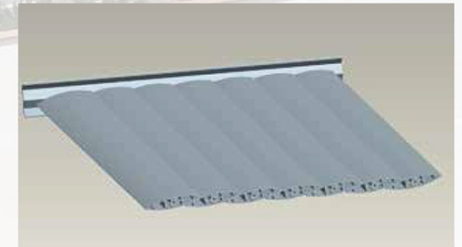

In conjunction to its ability to allow or block weather conditions into its space, the Hydro One Picola also features a unique gutter system to channel rainwater safely away through the opening of the post without causing undesired splashes. Now, you can always unwind and relax whenever and whatever the weather is like.

Conclusively, the Hydro One Picola is a place where the magic happens as drops of spring sun and orange sunset cascade through its sturdy aluminum blades to create a warm and beautiful atmosphere. Introduce it to your home, and it will introduce your guests to its welcoming space, serving as a tranquil place to engage in lively conversations or have a premier breakfast. Truly, the Hydro One Picola is the pinnacle in contemporary outdoor living and spells utmost majesty in every way.

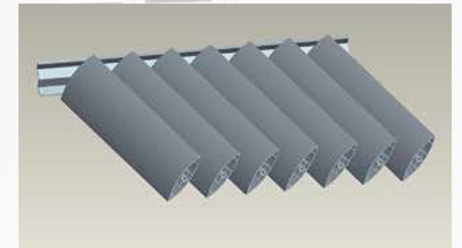

Features :

- Guaranteed rust-proof and built to last.
- Protection from UV Sunlight.
- Protection from rain.
- Yet allowing air flows for better ventilation.
- Automation. In-built with the opening and closure of the roof blade is fully operated by remote control

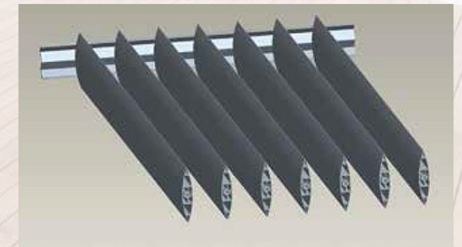

Roof Blade angle fully closed. Efficiently block the rain.

Roof Blade angle Semi fully open, a total block of sunlight but with ventilation.

Roof Blade angle fully open, allowing for maximum ventilation.

ADDITIONAL FEATURES

VINYL MOTORIZED BLINDS

The Hydro One Picola can be further incorporated with motorized blinds which are completely waterproof, owing to its quality vinyl material. This augments your outdoor living experience by eliminating hindrances to your comforts such as rain and prevailing winds.

Now, your pergola can transform an outdoor area into an indoor ambiance with the aid of the motorized blinds. You are in control of the weather in your pergola. The aluminum blades and motorized blinds work with one accord to either fill your outdoor space with vibrant rays of sunshine or shield you from the concentrated UV rays and rainfall.

The operation of the motorized blind is rather simple with a simple touch of remote control.

LED LIGHT

Hydro One Picola can be complemented by enlivening LED light which extend your enjoyment under your pergola beyond the time of sunset. Unite with your friends and family, and throw a barbecue party at night with your pergola being the light of the party! With the aid of the LED light strips in conjunction with the motorized blinds, our vision of the perfect pergola is one step away from completion.

Lighten up your outdoor garden with LED light. to further enhance the ambient of your garden and outdoor area.

WIND & RAIN SENSOR

The Hydro One Picola doesn't just end here. It has more to offer besides the motorized blinds and LED light. Hydro One Picola offers a state of the art wind & rain sensor which alerts you on prevailing winds and humidity increases which are phenomenons that occur before a downpour. The aluminum blades work collectively with the sensor and respond accordingly to wind and rain signals to ensure the everlasting comfort of its users. Now, with all these additional features integrated with your pergola, it is aligned with our vision of the perfect outdoor experience.

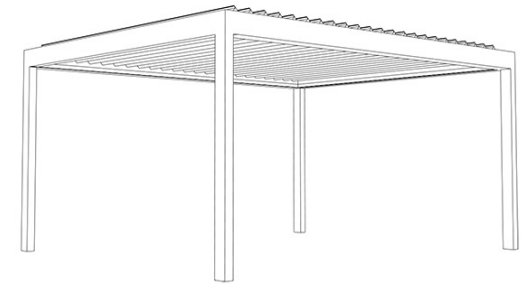

CONFIGURATION

Hydro One Picola has unlimited configuration strategies to complement any home. Whether your home's architecture makes it seem impossible to install a pergola, Hydro One Picola's versatility will not fail to satisfy.

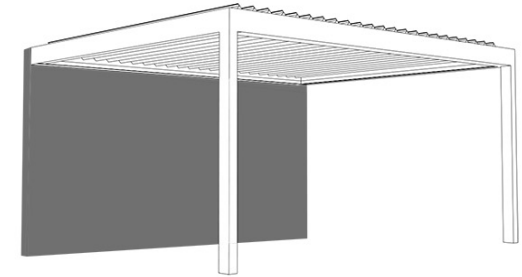

Our pergola can be installed in an array of methods such as freestanding, front leaning, or wall-mounted. Each method will ensure that your pergola is in a secure and stable position to provide you with the comfort that you deserve.

PICOLA'S ACCESSORIES

The Hydro One Picola series offers aesthetically pleasing accessories which elevate your garden experience in the embrace of the Hydro One Picola. The array of furniture accessories features Ratan, to diffuse that rare woodland forest vibe into any urban home, and the modish Aluminum & Wood, reminiscent of a beachside cafe's tables laden across the golden sands, an ideal companion for your pergola. The Hydro One Picola furniture will start a conversation, owing to their artistic appearance and simplistic colors.

The Hydro One Picola furniture is designed not to stand idly as an ordinary decor item, but to breathe emotion and life into any garden space, giving you an indescribably fascinating outdoor experience. Gather your friends and family together with Hydro One Picola incorporated with the garden furniture, making your garden a place worthy for toasting triumphs, investing in quality people time, indulging into the ambiance to unwind, and ultimately, to creatively and ingeniously transform any outdoor space into a surreal mix of reality and fantasy.

TECHNICAL SPECIFICATIONS

The aluminum used in the Hydro One Picola has been administered with preventive treatment to apply a layer of protection on its surface after cleaning. This effectively protects the unalloyed aluminum from the aggressive effects of weathering and corrosion. Powder coating further increases the protective layer of the aluminum. The product comes with a 10-year warranty.
