

THE TOUCH OF RELAXATION

The touch of
relaxation.

Introducing Hydro One HotSpa

Supercharge Your Body, Mind, and Health With a 5-Star Spa Treatment from Home

The Hydro One Hot Spa invites you to indulge in a luxuriously relaxing experience. With built-in water jets, ambient LED lights and aromatherapy... an adventure of never-ending relaxation awaits! Our family-friendly Hot Spa come in multiple textures and colours that mesh beautifully with your outdoor space.

Discover our range today and see why people call our products the "Spa made for life."

Life with a Hydro One Hot Spa

Greeted by ambient lights and warm, gentle steam, you slowly lower your feet and then your body into the water. Jets massage deep into your muscles like an authentic massage as you lay back against the incredibly soft cushioning. For a moment, it's almost as if every worry flees your body. A sense of calm sets in while joy trembles in your heart. Today, you get to pull this feeling straight from the heavens into your home with a Hydro One Hot Spa. *This must be what it's like to live your dreams.*

Relieve Mental Stress

The massage therapy offered by the built-in water jets alongside the aromatherapy feature and soothing LED lights can reduce up to 49.7%* of the stress hormone cortisol.

Enhance Blood Circulation

Immersing in a hot spa is scientifically proven to widen blood vessels, increase blood and O2 delivery, and reduce blood pressure. This, in turn, accelerates cell regeneration.

Relax Muscles & Ease Pains

Muscle aches and pains arise from nonstop physical work, bad posture, and sports play. Combat them with the deep, targeted massage feature alongside heat therapy.

Loosen Joints & Tendons

Heat therapy relaxes stiff joints and tendons due to ageing and a sedentary lifestyle. This prevents joint injuries and promotes movement flexibility.

Improve Quality of Sleep

Studies show that more stress results in low quality sleep, and low quality sleep results in more stress. Our Hot Spa puts an end to the cycle by directly reducing cortisol levels.

Cleanse & Brighten Skin

Steam from the hot spa opens pores, removes oil and sebum, and draws toxins out of skin cells. The result? A healthy, radiant, and youthful complexion with soft, bouncy skin.⁵

Promote Heart Health

According to a 2016 study, heat therapy via hot spas demonstrates significant effectiveness in lowering blood pressure and can help reduce the risk of cardiovascular disease.

Improve Metabolism & Burn Calories

In a 2016 study on hot spas as a treatment for metabolic illnesses, 14 participants soaked in a hot bath for 1 hour and burned about the same no. of calories as a 30-minute walk.

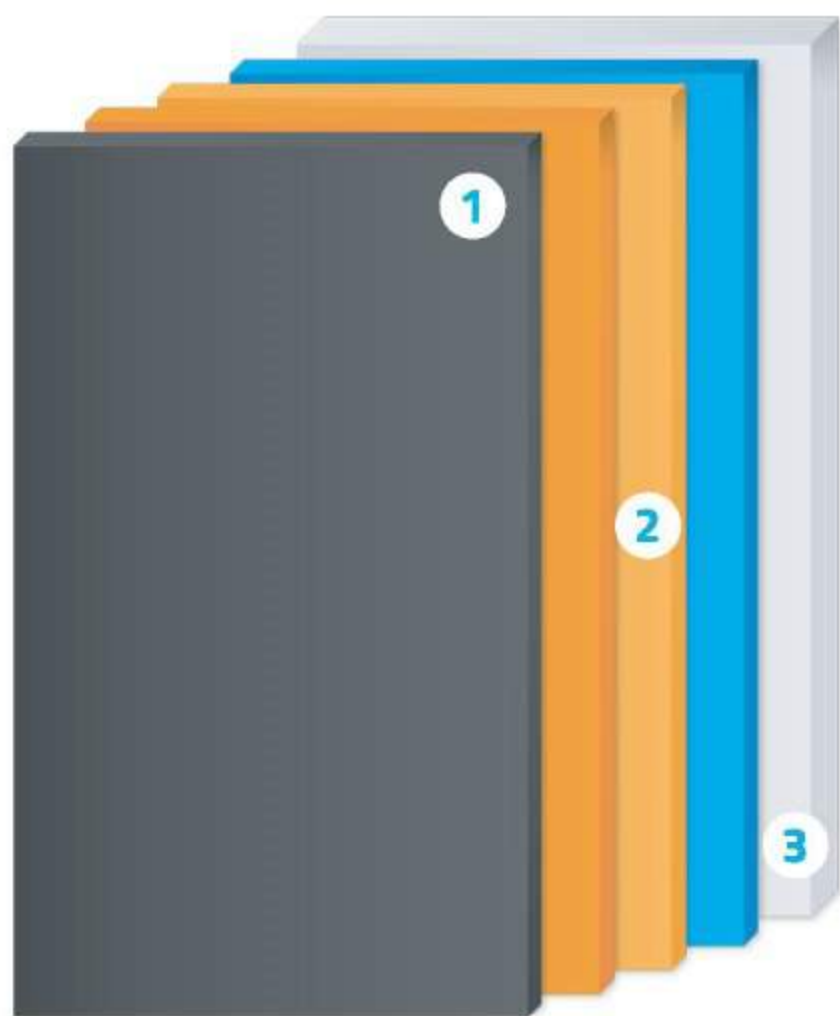

Experience you can trust. Quality you will love.

We believe that by making small, meaningful changes to your life, greater transformations will follow. But for any change to be made, one must be ready to challenge the limits. So, we created Hydro One Hot Spa with a bias towards innovation, quality, and craftsmanship.

The Hydro One Hot Spa begins life as an idea, then prototype, and finally, a fully functional product in our in-house R&D facility that is manned by a team of designers, technicians, and product developers with 18+ years of experience in the pool and spa industry.

We want Hydro One Hot Spa to not just be an accessory that's nice to have. We want it to be a masterpiece that defines the edge of luxury home spas, brings your family together, and drives meaningful conversations about life. We want it to be a creation made for, well, life. Hence, it would only be fitting that the materials we use are the best-in-class...

We only trust our raw materials to suppliers with over 15 years and a proven track record in the spa industry. Nothing short of the enterprise grade — and that's our promise to you. Currently, we source our acrylics from Lucite Inc. in the USA and manufacture in Australia.

Designed for your peace of mind.

- 1 Premium acrylic shell**
The strong acrylic shell of your Hot Spa offers protection and style.
- 2 Polyester resin core**
Under the acrylic shell lies layers of polyester resin which make up the main structure. This strong and flexible material defends your Hot Spa against structural damage and water leaks.
- 3 Polyurethane insulation**
The exterior of your Hot Spa is constructed of a thick layer of polyurethane, which provides thermal insulation.

- 1. Base** | Thick base protects from humidity and ground moisture.
- 2. Polyester resin construction** | No wood or other degrading materials.
- 3. Air pump** | This powers the spa's air massages.
- 4. Massage pump** | This powers the spa's water massage jets.
- 5. Electric cabinet** | Keeps electrical components stored safely away.
- 6. Ozoniser** | Aerates the spa's water for optimal disinfection.
- 7. Filtration pump** | Activates and powers water filtration system.
- 8. Cartridge filter** | Long-lasting and energy-saving water filter.
- 9. Water Discharge Outlet**

Cutting-edge hydrojet technology.

Each jet is strategically positioned to maximize the beneficial hydrotherapy effects on your body. Easily configure jet settings for simple baths or full-body massages with your smartphone!

Micro Hurricane Jets

The Micro Hurricane Jets are designed for a strong massage effect with a small jet face. These jets are fixed in place and are always on when your Hot Spa is running.

Mini Hurricane Jets

The Mini Hurricane Jets are interchangeable with each other. Move them around to suit your massage type.

Large Hurricane Jets

The Large Hurricane Jets are interchangeable with each other. Move them around to suit your massage type.

A hot tub is shown from a high angle, illuminated with a vibrant blue light. The water is bubbling, and the tub's interior features several jets. A control panel is visible on the left side of the tub. The background is dark, making the blue light stand out.

Brighten your spa experience.

Set the mood with the intelligent LED lighting system featuring multiple colours and a colour-changing mode that makes for an invigorating experience. Reflect on the most colourful moments in life as you enter a clear headspace, free from the distractions of city life.
