No 15, Jalan USJ 3/2, USJ 3, Subang Jaya,
47600 Subang Jaya, Selangor, Malaysia.

Viewing by appointment only.

Model: "IBIZA"

The Making of a World Class Pool

The sophisticated production of each Hydro One Fiberpool is the reason our pools are of superior quality. Using innovative materials and processes, each Fiberpool is subjected to stringent quality control throughout production and rigorous in-house testing prior to installation.

1

1. Mold Preparation

A singular mold is cleaned and polished thoroughly with wax, helping form the smooth finish for the pool. The initial releasing agent applied is intended to ease the removal of the mold later.

2

2. Foundation Layers

The foundation layers are sprayed into the mold, starting with the waterproof Cray Valley ISO NPG Gel-coat. The subsequent layers of Vinyl Ester Resin and Fiberglass provide support, strength, and durability of the entire structure.

3

3. Curing & Fittings

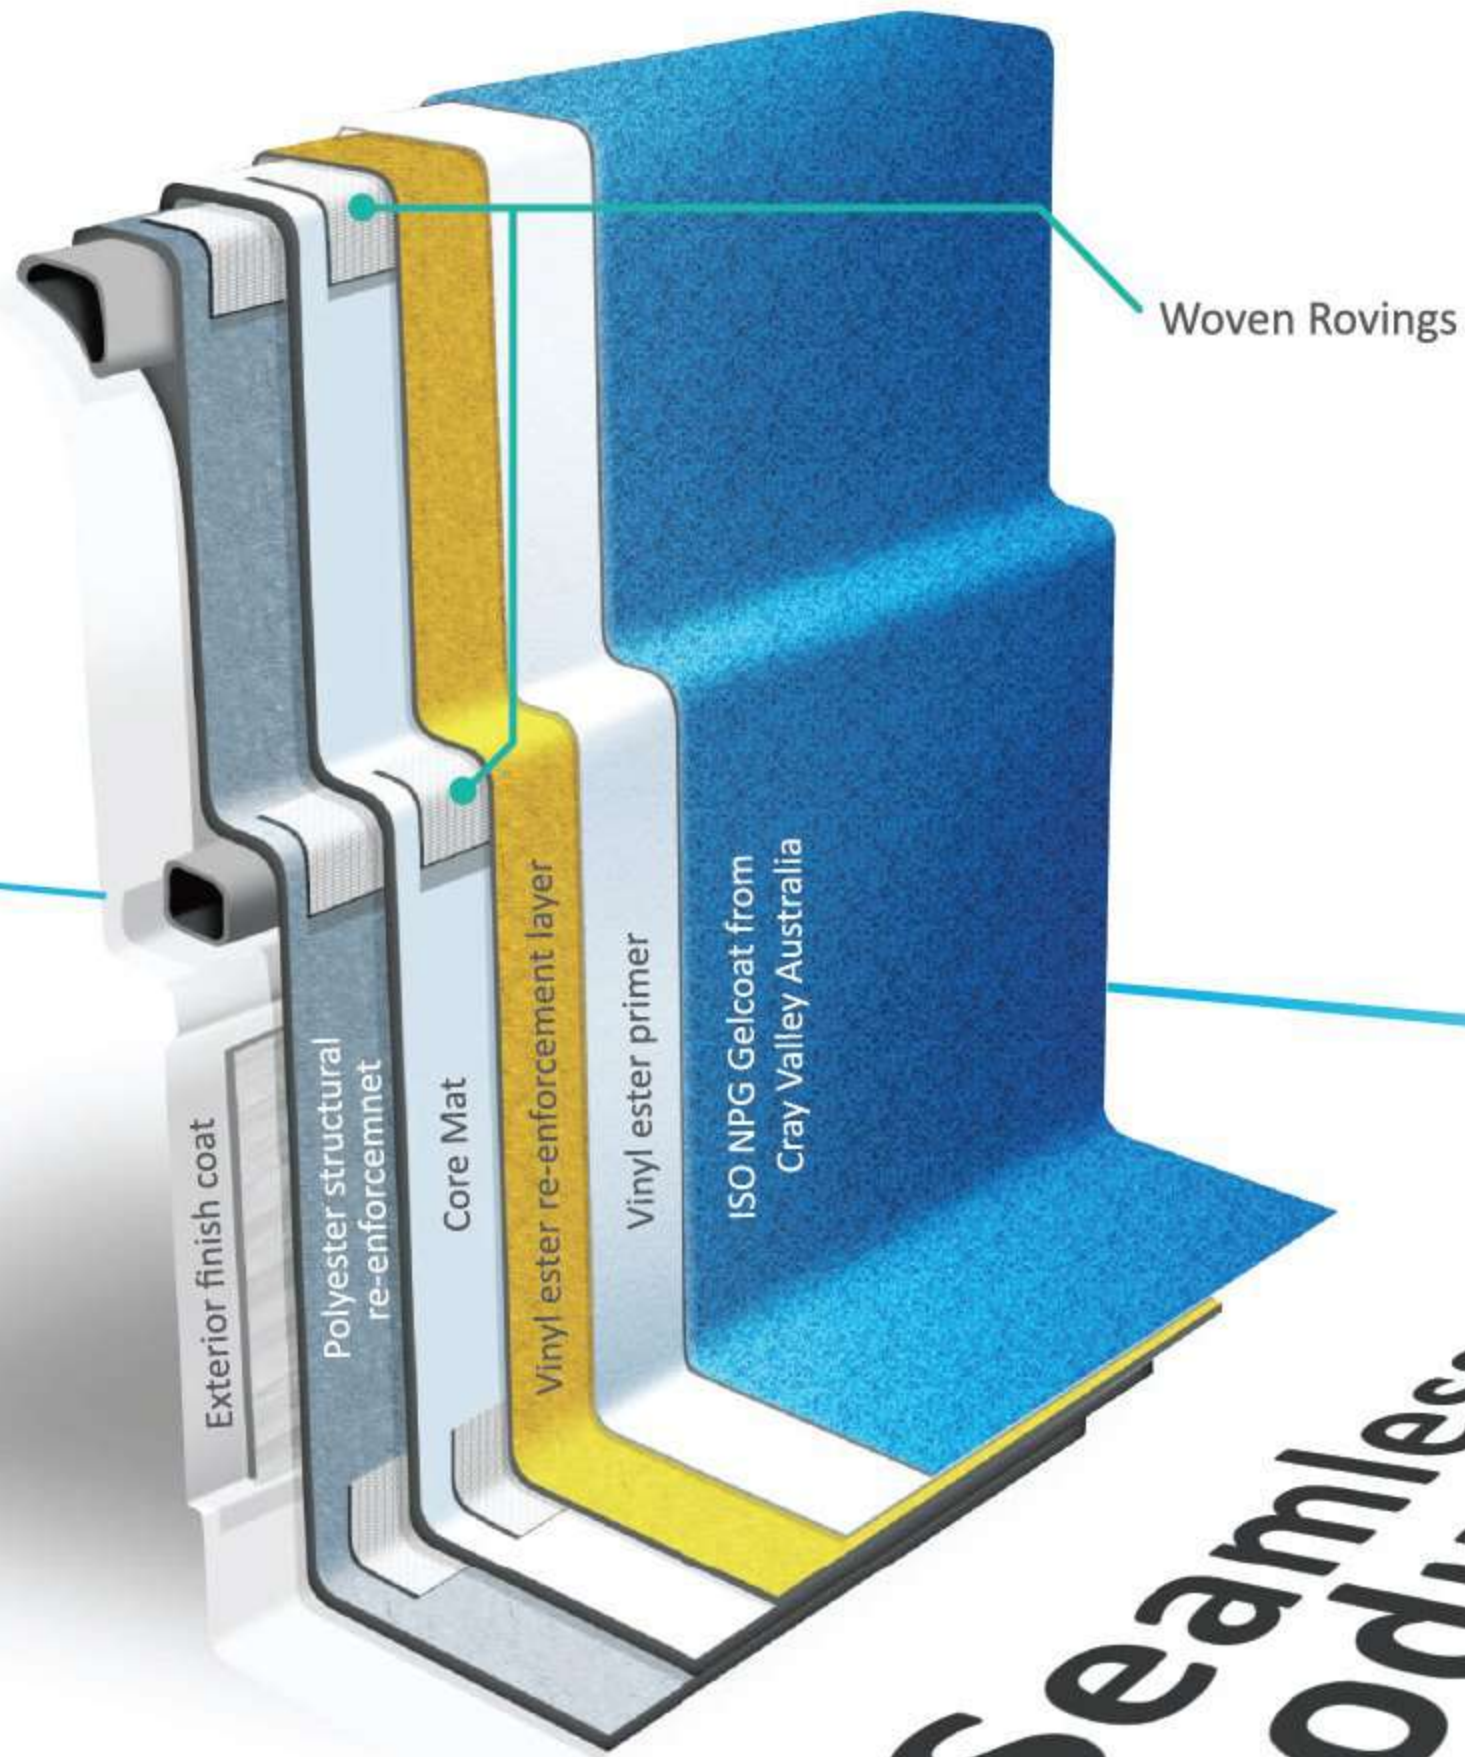

After the structural layers undergo a curing process, the single-piece, extremely sturdy structure is finally formed and demolded. The pool fittings — Inlet, Main Drain, Skimmer, and Piping — are fused onto the structure with fiberglass, safeguarding against leakage.

4

4. Polishing & Finishing

The last step is a three-layer polishing and anti-scratch treatment to achieve a glossy, smooth, and durable finish. Finally, your pool is ready to be delivered and installed!

The Ideal Pool

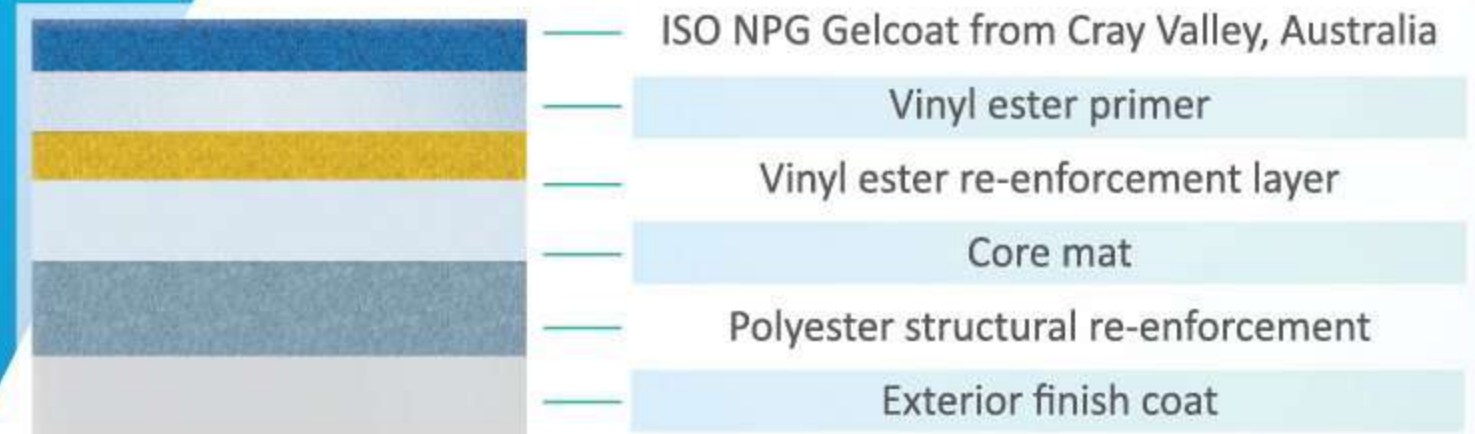

Hydro One Fiberpool consists of a singular, pre-fabricated structure to make installation and upkeep a breeze. The body is made from six layers of carefully selected material for added strength and durability.

CRAY VALLEY

The decades of experience behind them has allowed Cray Valley to become a world leader in thermoset composites. They produce the premium gel-coat that forms the non-abrasive, non-slip surface of the pool. The company invests significantly in continuous research and development, ensuring products of utmost quality.

Fiberpool Gel-coat Finishes

Our Gel-coat Finishes enhance your pool with a 3D glitter effect.

The aesthetic of the pool surface is truly important. It will not only affect the aesthetic of the outdoor living space of your lovely home, but also your enjoyment of your pool. Many fiberglass pools are made in plain and solid colours, but Hydro One Fiberpools come in multiple stunning and dynamic shade options to choose from.

Our revolutionary manufacturing techniques have enabled us to create pool surfaces with three-dimensional and glittery effects. The result is an eye-catching, luxurious pool that catches and reflects light as it filters through the water. No matter which shade you choose, you can expect your Fiberpool to look impressive, inviting, and beautiful even on an overcast day. Available in five trendy colours for selection.

EcoFinish Aquatic Coatings

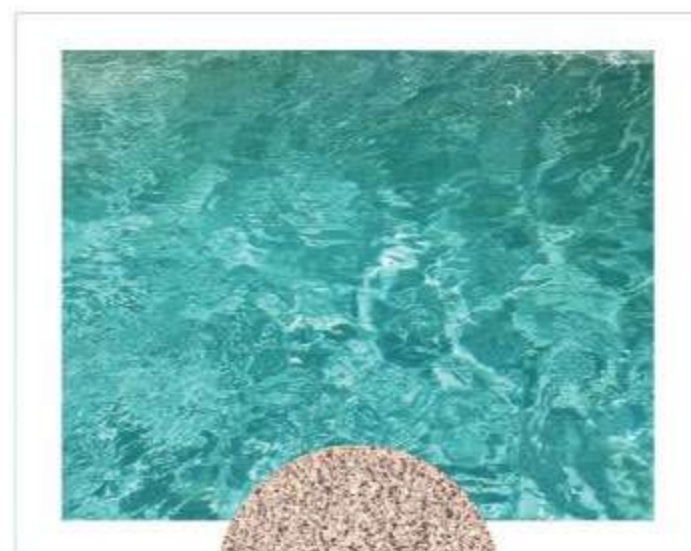

EcoFinish High Performance Aquatic Coatings

EcoFinish thermo-polymer coating is a scientific aquatic coating with patented polymer powder with patented flame spray process to apply the aquatic coating onto fiberglass pool surface. The technology is acquired from the leading aquatic coating company from the USA — EcoFinish — to be applied exclusively on Hydro One Fiberpools. The patented coating technology is highly resistant against chemicals, stains, and cracks. Certified and comply with NSF/ANSI61 Drinking Water System Components.

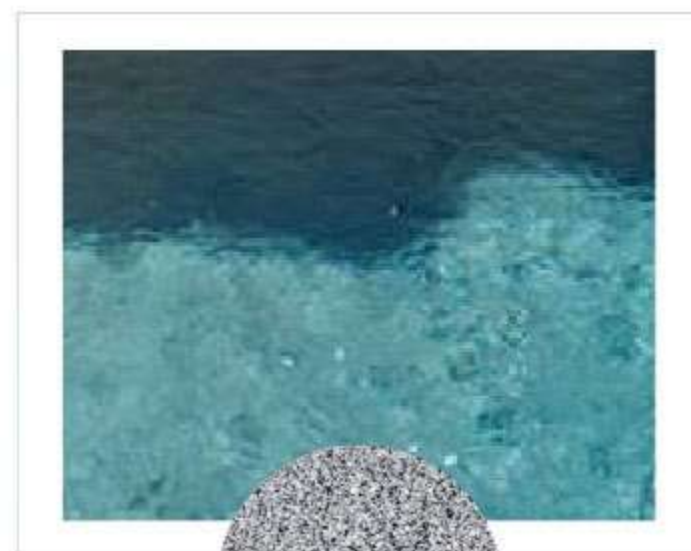

The EcoFinish thermo-polymer is available in four rich shades, all containing color variation that adds depth and enhances the pool's aesthetic.

Why Fiberpool?

Easy Maintenance & Fewer Repairs

The smooth, seamless surface of our fiberglass pools makes cleaning effortless. While conventional concrete pools require frequent, vigorous cleaning to remove algae from nooks and crannies in surface tiles, this is not required for Fiberpools. Occasional gentle cleaning will suffice. In addition, the single-piece structure and strong foundation materials make leakage or the need for repairs much less likely.

Simple & Fast Installation

A concrete pool typically takes up to three months to install, involving multiple contractors. Such a complicated process requires more labor, costs, planning, and oversight. Fiberpools take no more than seven days to install and you only have to worry about communicating with one party throughout the process — that's us.

Leak-Free & Built to Last

Conventional pools require resurfacing every few years to last. Fiberpools do not require this costly and disruptive process — they are made to last a lifetime. Additionally, our single-piece design eliminates joints and assembly points, making leaks significantly less likely.

Quality Controlled & Warrantied

All our products are pre-tested in our workshop, ensuring their quality before delivery to our customers. To show we stand by our products, we offer a ten-year warranty for all Fiberpools.

Vinyl
(in-ground & above-ground)

Concrete
(in-ground)

Installation Time	5-7 Days by HydroOne Team	2-3 Weeks by Multiple Contractors	8-12 Weeks by Multiple Contractors
Entry & Exit	Slip-Resistant Stairs & Floors	Ladder Inside & Out	Stairs with Ladder at Deep End
Pump Circulation Time	4-6 Hours Daily	5-7 Hours Daily	8-10 Hours Daily
Surface Texture	Smooth, non-abrasive to skin or swimsuits; textured walking areas	Slippery, easily punctured or torn by toys, pets, or rocks	Rough, causes skin abrasions to feet and hands
Algae Growth & Cleaning	Algae sweeps off walls easily	Seams harbor algae	Pores and texture harbor algae
Maintenance Time (est.)	15 minutes per week	2-3 hours per week	4-5 hours per week
Major Renovations	None	Vinyl liner replaced after 3-7 years	Replastered after 5-7 years
Stairs & Seating	Built into pool body; several options available	Optional & additional cost	Optional & additional cost
Quality Control	Manufactured in environmentally controlled factory under stringent quality control standards.	Kit manufactured in factory; quality of assembly depends on installer	Manufactured on-site with no environmental control
Coating Type	Fiberglass or concrete	Aluminium; easily corrodes	Concrete

Model:

Redang

A cosy pool that fits into any corner.

Excellent for a relaxing splash on sunny days.

Pool Specifications

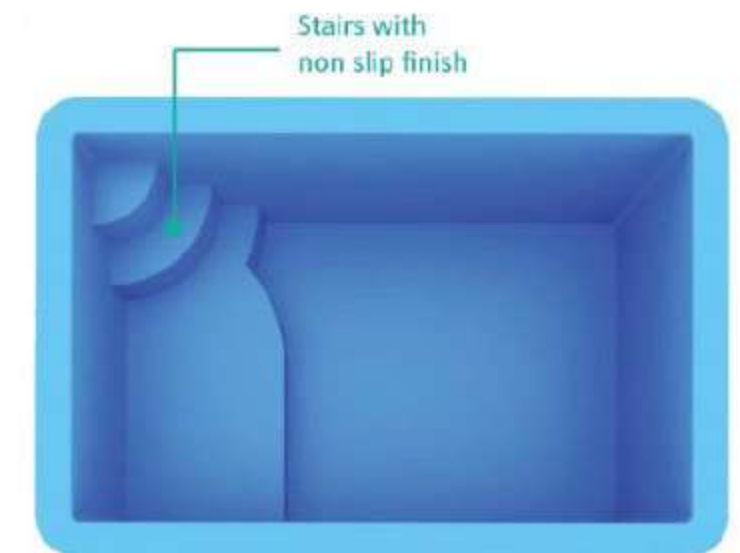

Length	4 m / 13 ft
Width	2.5 m / 8 ft
Depth	1.2 m / 4 ft

Basic Equipment

Pump	0.5 HP
Filter	16" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Model:

Sipadan

Sleek and sophisticated, designed for narrow spaces without compromising on features, style, or swimming space.

Pool Specifications

Length	5.5 m / 18 ft
Width	1.9 m / 6.5 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	0.75 HP
Filter	20" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Phuket

A moderately sized pool for leisure swims, casual dips, and playtime with kids.

Pool Specifications

Length	6 m / 20 ft
Width	3 m / 10 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	0.75 HP
Filter	20" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Bali

A longer pool that allows lap swimming and accommodates several swimmers comfortably at a time.

Pool Specifications

Length	7.5 m / 25 ft
Width	2.4 m / 8 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat
- Cross Current
- UV Ionizer

Basic Equipment

Pump	0.75 HP
Filter	20" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Mauritius

Stylish and contemporary in design,
created to complement any size of outdoor
entertainment area.

Pool Specifications

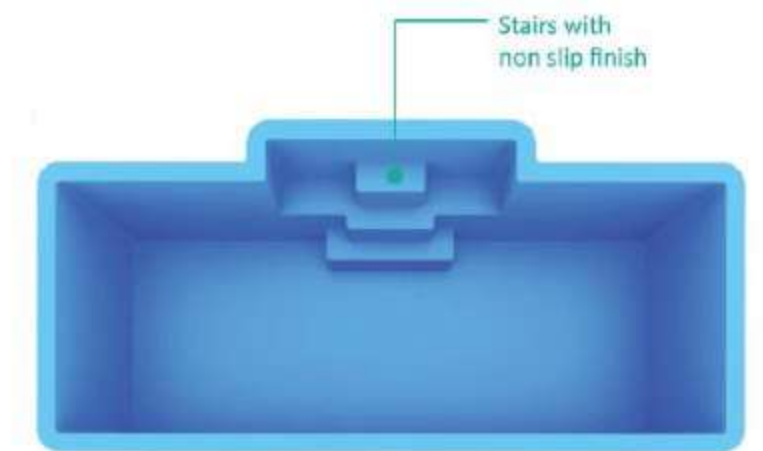

Length	8 m / 25 ft
Width	3.5 m / 11.5 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	1.0 HP
Filter	20" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Ibiza

A pool designed to give you the ultimate lap swimming experience in a space-efficient package.

Pool Specifications

Length	10 m / 33 ft
Width	3 m / 10 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

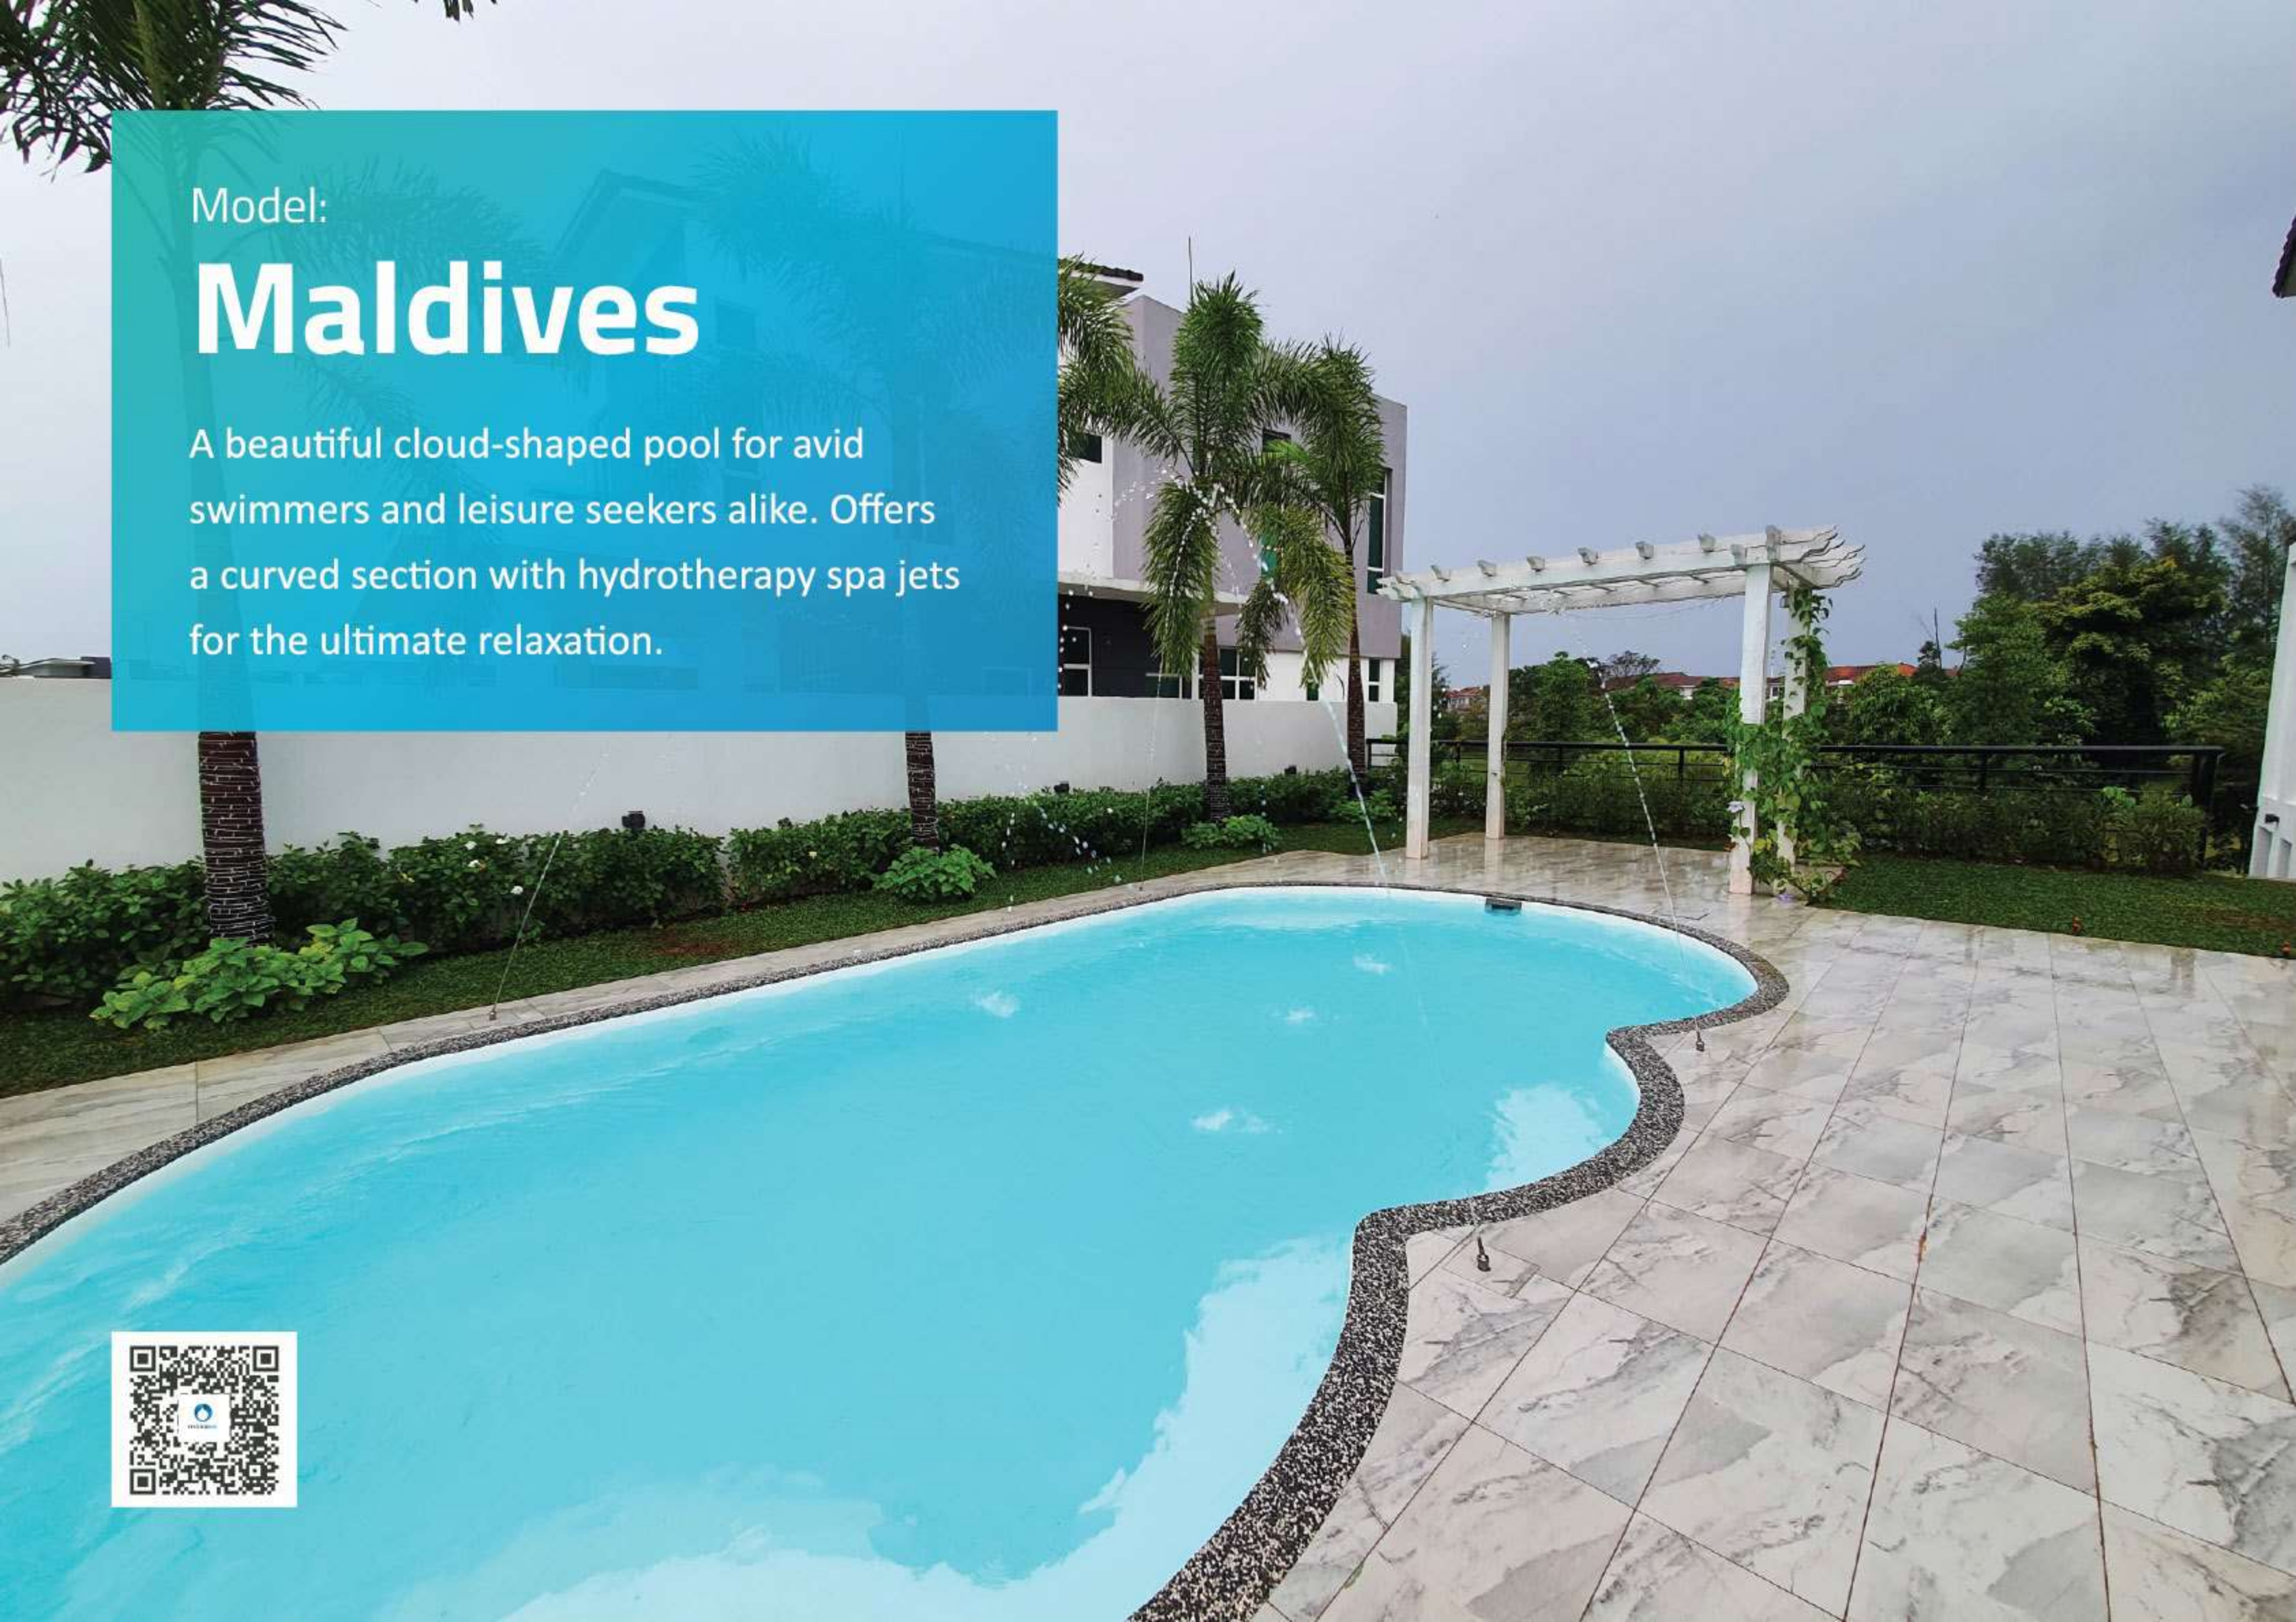

Pump	1.0 HP
Filter	20" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Maldives

A beautiful cloud-shaped pool for avid swimmers and leisure seekers alike. Offers a curved section with hydrotherapy spa jets for the ultimate relaxation.

Pool Specifications

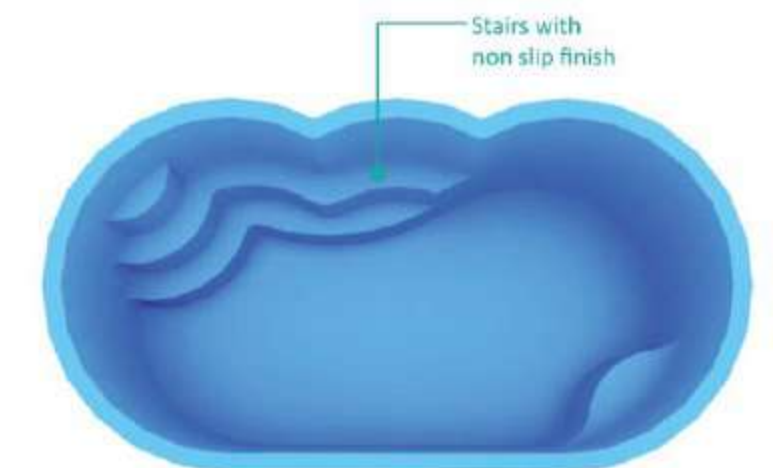

Length	8 m / 26 ft
Width	4 m / 13 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	1.0 HP
Filter	24" diameter
LED Light	2
Pump House	Provided
Cleaning Kit	Provided

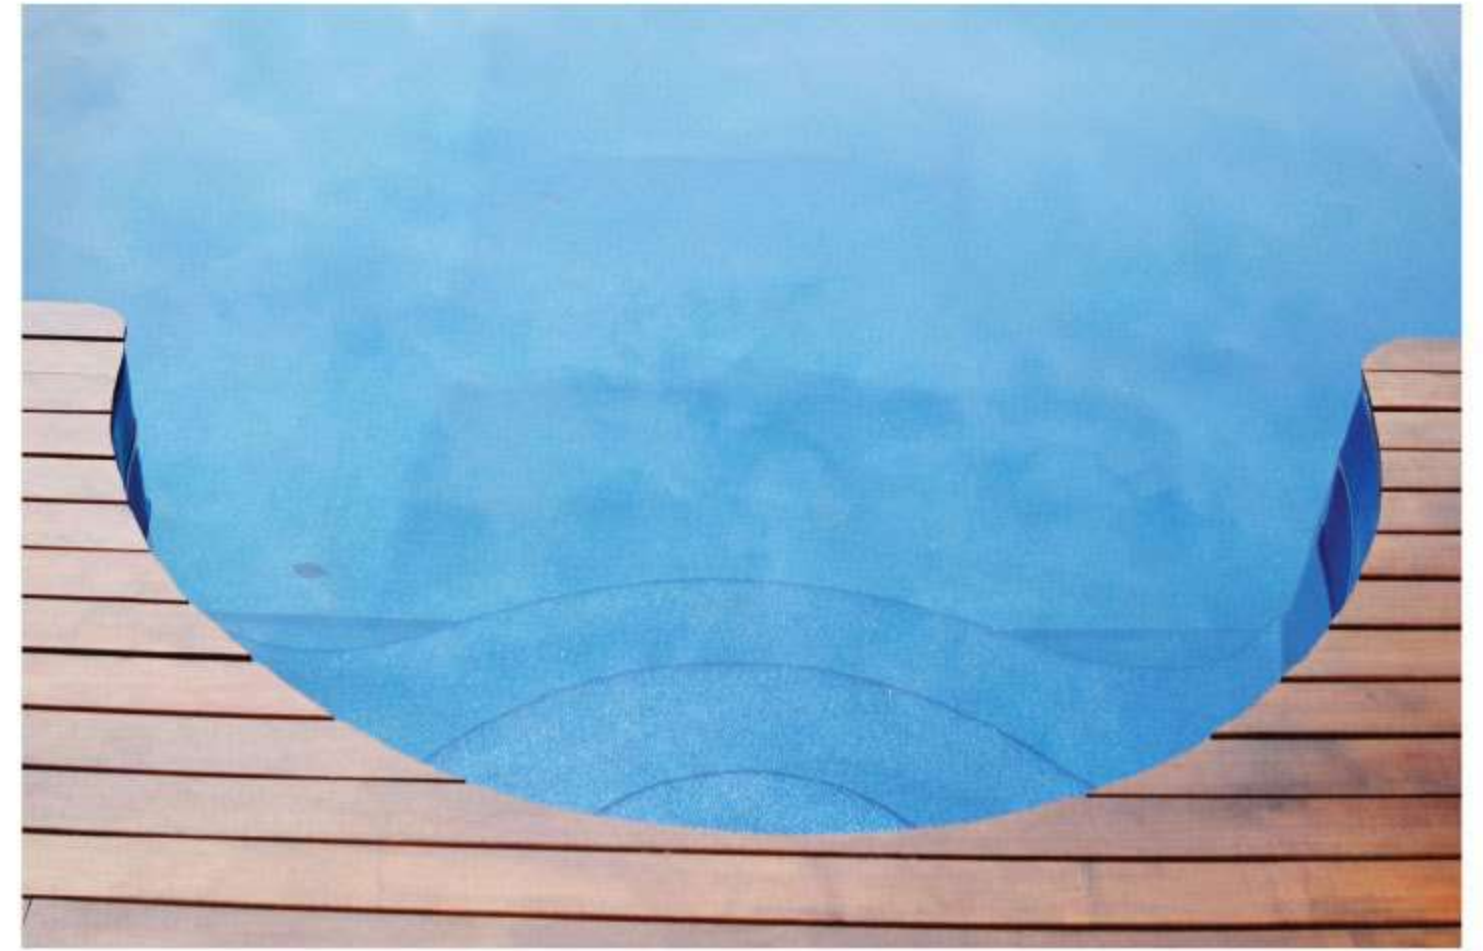

Model:

Caribbean

The most luxurious of them all, this expansive pool accommodates the most enthusiastic swimmer for a satisfying workout. At one end, spa seats are fashioned for the ultimate pampering by spa jets. With this much space, everyone can dive in and enjoy in their own way!

Pool Specifications

Length	11.5 m / 38 ft
Width	4 m / 13 ft
Depth	1.2 m / 4 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	1.5 HP
Filter	30" diameter
LED Light	2
Pump House	Provided
Cleaning Kit	Provided

Model:

Lombok

A pool that combines beauty, safety, and relaxation in one. Ideal for families with small children.

Pool Specifications

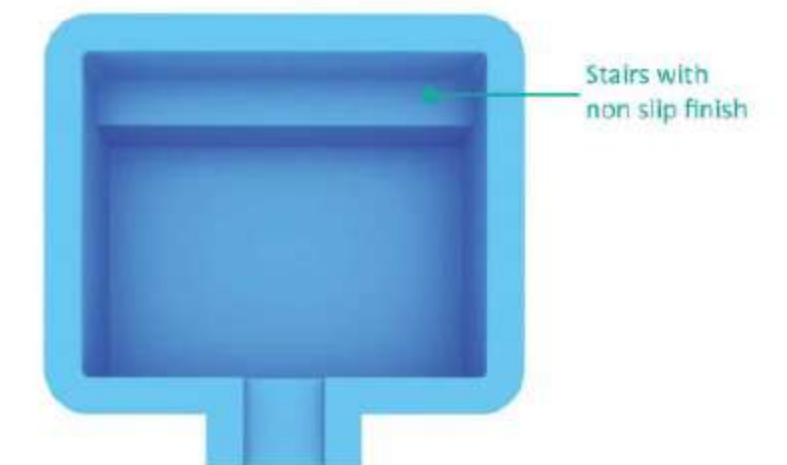

Length	2.5 m / 8 ft
Width	2 m / 6.5 ft
Depth	0.6 m / 2 ft

Optional Accessories

- Spa Seat**
- Cross Current**
- UV Ionizer**

Basic Equipment

Pump	0.5 HP
Filter	16" diameter
LED Light	1
Pump House	Provided
Cleaning Kit	Provided

Model:

Tioman

A pool that combines beauty, safety, and relaxation in one. Ideal for families with small children.

Pool Specifications

Length 3 m / 10 ft
Width 2 m / 6.5 ft
Depth 1.2 m / 4 ft

Optional Accessories

Spa Seat
Cross Current
UV Ionizer

Basic Equipment

Pump 0.5 HP
Filter 16" diameter
LED Light 1
Pump House Provided
Cleaning Kit Provided

Custom Fiberpools

Build the pool of your dreams

In the past, fiberglass pools have come with limitations on size and shape. Hydro One has met and overcome this challenge with our custom fiberglass pool design and installation process.

With our vast experience in the swimming pool industry and integrated manufacturing facility, we are excited to now provide custom Fiberpools made to your size and shape specifications. As pioneers of the fiberglass pool, we are dedicated to maintaining the same level of quality for our custom pools as we are for our standard product lineup.

For our custom pools, we stay true to our principle of single-piece, leak-proof structures. We will design and fabricate your custom pool with the same methods and materials as our standard pools. For pools that exceed road width restrictions for transport, we will fabricate the pool in panel sections and join the sections together on site using the same techniques we use in-house.

Custom Tile

Our custom-made fiberglass pools can be made using our superior glitter gel-coat finish or laid with glass mosaic tiles of your choice. This option can help you create a pool that is truly your own or integrate into your unique space perfectly.

Infinity Pool

We possess the expertise, experience, skill, and materials to fabricate custom fiberglass pools with infinity edges — all still in one leak-proof piece. The infinity edge can help pools on balconies and ledges appear to integrate with their environments and seem endless no matter their actual size.

Pool Equipment & Fittings

1 Water Pump & Filtration System

This is the heart of the swimming pool. Over the years, a variety of integrated filtration systems have been introduced to the market, yet maintenance on these systems remains tedious, requires heavy use of chemicals to maintain water clarity, and forces your pool into extended downtime when they need to be replaced. Fiberpools' Sand Filtration System, however, is a time-proven system for many decades that is still ideal. Matched with a quality pump, you'll enjoy higher flow-rate, excellent circulation, and fewer chemicals in your swimming water. The Sand Filters and Pumps, which are fully manufactured by Hydro One, have proven quality and durability with ten-year presence in over 42 countries worldwide.

2 Pool Fittings

The Inlet, Skimmer Box, and Main Drain are incorporated into the pool structure during the production stage and tested prior to delivery.

3 Pump House

The Control Panel and other equipment are installed in a specially-built, outdoors-durable equipment house, installed by us in any secluded corner of your garden area you wish.

4 Skimmer Pool System & Components

Hydro One employs the Skimmer Pool System that is ideal for personal swimming pools, allowing for efficient water circulation flow and removal of debris and particles. Yet, it does not require overflow trenches with unsightly grating covers or construction of a balancing tank. Our system makes for a cost-effective, space-savvy solution right from the beginning. The wall-mounted surface skimmer disrupts the tension of the water surface, drawing water over a self-adjusting floating weir while the return inlet allows water to flow back in.

Lighting

Integrated Multi-Color LED Lighting

Set the mood with underwater LED lighting! From pure white to striking magenta, these dynamic multi-colored lights further enhance the aesthetics of your pool and add a custom touch.

The control panel that controls the LED lights is installed in your equipment house that is included with your pool purchase and installation. The control panel comes with a remote control for convenient lighting control from a distance.

These lighting features are sure to impress guests, delight children, and turn up the everyday luxury relaxation of your Fiberpool.

Cyan

Optional Accessories

Spa Jets

Any pool can be transformed into a relaxing jacuzzi with the addition of strong water jets. Enjoy a hydrotherapy treatment when your body is tense, when you're experiencing stress, or simply each time you soak in the pool.

Pool Fountain

Our stainless steel pool fountain can turn your swimming pool into a sophisticated water feature and beautify your backyard. The pool fountain is equipped with an LED light strip which will further enhance the ambience of your pool and garden area.

UV Ionizer

This revolutionary UV Ionizer by Blue Lagoon (Holland) is a combination of UV sterilization and copper electrolysis. This clever piece of equipment wholly replaces the need for chlorine while still maintaining sparkling water that satisfies the highest hygiene standards and eliminating day-to-day maintenance hassle.

Stingray Automatic Pool Cleaner

Imagine how good life can be if cleaning your pool can be automated! Stingray, the most advanced automatic pool vacuum cleaner on the market, is fully driven by hydraulic force without electricity or any other power supply needed.

UWE Cross Current

For Athleticism

The UWE Jetstream Counter-Current System from Germany was inspired by the mussel, and even its appearance makes waves. Powered by a 4.5HP pump system, up to 18 litres-per-second can be pumped through its fully adjustable swivel nozzle. Suitable for all levels of swimmers.

For Aesthetics

We believe the UWE Jetstream Counter-Current System's front panel is a beautiful addition to your swimming pool. Its elegant chrome finishing and simplicity of design will be the master stroke for any pool. The swivel nozzle is fully adjustable and the intensity of the flow can be fully regulated in either direction.

For Relaxation

With the UWE Jetstream, you can do far more than try your strength at swimming. Turn the knob and the flow from the nozzle changes to a soft stream of bubbles. Use the massage hose and the back jet to loosen up tense muscles and relax exactly those parts of your body that need it most. Or turn the pressure down to half power and stand right in front of the nozzle for a powerful all-over massage.

Brand & Origin	UWE Jetstream, Made In Germany
Installation	Concealed at swimming pool wall
Pump System Capacity	4.5HP (3,550 W)
Power Supply	440 V / 50Hz / 3 Ph
Flow rate	18 liter-per-second
Nozzle	Swivel Jet Nozzle
Adjustable & tiltable nozzle	YES
Air bubble bath	YES
Adjustable air flow	YES
